

# MATERIAL SAFETY DATA SHEET

# FUJIAN KUNCAI MATERIAL TECHNOLOGY CO., LTD.

Revision date: 2021/01/05

version:1.0

Section 1. Identification of the substance/mixture and of the company

1.1Product Name: COSMI 850-R1 Super Flashing Granary

Further information obtainable from : Fujian Kuncai Material Technology Co., LTD.

Address : Haicheng road, Yuanhong invest zone, Fuqing (Fuzhou), Fujian, China. 350314

*Hotline:* 400-0588-868

*Tel:* +86-591-85588193

*Fax:*+86-591-85572333

E-mail:fzkc@fjkuncai.com

Web site:www.fjkuncai.com

Use: Cosmetic ingredient

# Section 2. Hazards Identification

# 2.1 Classification of the substance or mixture:

# • Hazard description: Not Applicable

• Information concerning particular hazards for human and environment:

The product is not classified as dangerous according to Regulation(EC)No.1272/2008 Classification system:

The classification is according to the latest edition of the Regulation(EC)No.1272/2008, and extended by company and literature data.

# 2.2 Label elements:

# Supplemental label information

*EUH212: Warning! Hazardous respirable dust may be formed when used. Do not breathe dust.* 

EUH210: Safety data sheet available on request.

2.3 Other hazards: Not available

# Potential health effects

## Primary routes of exposure:

Routes of entry for solids and liquids include eye and skin contact, ingestion and inhalation. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

## Irritation / corrosion:

Inhalation of dust may cause respiratory tract irritation, coughing and breathing difficulties. Contact with the eyes or skin may cause mechanical irritation.

Chronic toxicity:

# Potential environmental effects

## Aquatic toxicity:

At the present state of knowledge, no negative ecological effects are expected. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations. The product has not been tested. The statement has been derived from the properties of the individual components.

21 77891       36-40       13463-67-7       77891         21 77891       36-40       13463-67-7       77891         21 77891       36-40       13282-10-5       77861         Section 4. First aid Measures:       General advice:       Remove contaminated clothing.         Section 4. First aid Measures:       General advice:       Remove contaminated clothing.         Sinhaled: Move person to firsh air. Consult doctor in event of any complaints.       If difficulties occur after dust has been inhaled, remove to fresh air and seek medical attention.         If makin: Wash with soap and water. If irritation persists, seek medical attention.       Wash throughly with soap and water. If irritation develops, seek medical attention.         fin eyes: Immediately fluck eyes with water for a least 15 minutes. Jf discomfort persists, seek medical attention.       Hirritation develops, seek medical attention.         fin eyes: Immediately fluck eyes with water for a least 15 minutes. Jf discomfort persists, seek medical attention. Keep in a cool place. Keep container dry.

7.1 Precautions for safe handling: Avoid dust formation. Closed containers should only be opened in well-ventilated areas.

Information about fire-and explosion protection: No special measures required.

- 7.2 Conditions for safe storage, including any incompatibilities:
  - Requirements to be met by storerooms and receptacles: No special requirements

Information about storage in one common storage facility: Not required.

Further information about storage conditions: None.

Incompatibilities: Not available

## 7.3 Specific end use(s): Not available

# Section 8. Exposure Controls Personal Protection

#### **8.1 Exposure controls:**

#### Personal protective equipment:

Wear a NIOSH-certified (or equivalent) organic vapour/particulate respirator. Observe OSHA regulations for respirator use (29 CFR 1910.134).

#### Eye protection:

Safety glasses with side-shields.

# Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/the substance/the preparation.

Due to missing tests no recommendation to the glove material can be give for the product/the preparation/the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

#### Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to be manufacturer. As the product is a preparation of several substances, the resistance of the

glove material can not be calculated in advance and has therefore to be checked prior to the application.

#### Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

#### General safety and hygiene measures:

Handle in accordance with good industrial hygiene and safety practice. Due to the colouring properties of the product closed work clothes should be used, to avoid stains during manipulation. Hands and/or face should be washed before breaks and at the end of the shift. Wash soiled clothing immediately.

#### Primary irritant effect

On the skin: No irritant effect

On the eye: No irritating effect

Sensitization: No sensitizing effects known

#### Additional toxicological information:

The products is not subject to classification according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version.

When used and handled according to specifications, the product does not have any harmful effects to our experience and the information provided to us.

Toxicokinetics, metabolism and distribution: Not available

Acute effects(acute toxicity, irritation and corrosivity) :

Quantitative data on the toxicity of this product is not available. Product does not contain any deleterious matter.

Repeated does toxicity: Prolonged or repeated exposure to dust may cause pulmonary problems.

### CMR effects (carcinogenity, mutagencity and toxicity for reproduction):

The results of animal experiments using pearl luster pigment of this type indicate no toxicological relevant properties. Since the substance is poorly absorbed, no systemic effects are to be anticipated.

Inhalation of dusts should be avoided as even inert dusts may impair respiratory organ functions. No evidence of carcinogenic properties. No evidence of mutagenic or teratogenic effects.

# Section 9. Physical and Chemical Properties

-	physical and chemical Properties:
Form	Powder
Odor	odorless
	free flowing powder with a super flash granary luster.
Particle size:	(25-100)µm
Explosion limits	
Lower	Not available
Upper	Not available
Oxidizing properties	Not available
Viscosity	
Dynamic	Not available
pH-value	4.0-9.0(10% aqueous suspension)
<b>Boiling</b> /Condensation	Not available
Point	
Melting /Freezing Point	Not available
Specific Gravity	<i>Approx.</i> 2.8~3.4 g / cm <sup>3</sup> (water=1)
Ignition temperature	Not available
Self-igniting	Products is not self-igniting
Danger of explosion	Product does not present an explosion hazard
Solubility	Insoluble in water
Electric conduction	Non-conduction
Impurity	<0.5%
Chemical stability	Acid and alkali resistance under the normal temperatures.
Section 10.Stability an	nd Reactivity
10.1 Reactivity: No decomp	position if used according to specifications
10.2 Chemical stability: A	cid and alkali resistance under the normal temperatures
10.3 Possibility of hazard	ous reactions: Not available
10.4 Conditions to avoid:	Not available
10.5 Incompatible materi	als: Not available
Materials t be avoide	ed: Not available
Dangerous reactions	s: No dangerous reactions known
Hazardous reactions:	when stored and handled according to instructions.

Hazardous polymerization will not occur. Decomposition products: Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated. Thermal decomposition: No data available. Corrosion to metals: No corrosive effect on metal.

# Section 11. Toxicological Information

# Information on toxicological effects:

Acute toxicity **Oral:** Type of value: LD50 Species: rat **Value:** > 2,000 mg/kg The product has not been tested. The statement has been derived from the properties of the individual components. Irritation / corrosion **Skin:** May cause mechanical irritation. **Eye:** May cause mechanical irritation.

# Section 12. Ecological Information

# 12.1 Toxicity:

No ecological problems are to be expected when this product is handled and used with due care and attention.

12.2 Persistence and degradability: Not available

12.3Bioaccumulative potential: Not available

**12.4 Mobility in soil:** Not available

12.5 Results of PBT and vPVB assessment: Not available

12.6 Other adverse effects: Not available

#### Additional ecological information:

## General notes:

Water hazard class 1(German Regulation)(Self-assessment):slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system. Fish

Acute: Fish/LC50 (96 h): not determined Chronic: No data available. Aquatic invertebrates Acute: daphnia/LC50 (48 h): not determined Chronic: No data available. Aquatic plants Toxicity to aquatic plants: algae/EC50 (72 h): not determined Microorganisms Toxicity to microorganisms: *bacteria*/*EC50* (0.5 *h*): not determined Degradability / Persistence Biological / Abiological Degradation Evaluation: Not readily biodegradable (by OECD criteria). The colourant is insoluble in water and can thus be separated from water

mechanically in suitable effluent treatment plant

ection 13.Disposal and 3.1 Waste disposal of s Must be disposed of or incir	
Dispose of in a licensed fac	ility. Do not discharge into drains/surface waters/groundwater. It is the waste o determine if a particular waste is hazardous under RCRA.
	can be re-used. Packs that cannot be cleaned should be disposed of in the same
nanner as the contents.

#### Section 16. Other Information

The contents and format of this MSDS are in according with REGULATION (EC) No.1272/2008.

#### DISCLAIMER OF LIABILITY:

The information in this MSDS was obtained from sources which we believe are reliable. However,, the information is provided without any warranty, express or implied, regarding its correctness. The conditions or method of handling ,storage, use or disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in anyway connected with the handling, storage, use or disposal of the product. This MSDS/SDS was prepared and is to be used only for this product. If the product is used as a component in another product, this MSDS/SDS information may no the applicable.

Abbreviations and acronyms:

ADR: Accord enropeen sur le transport des merchandises dangerous par Route(European Agreement concerning the international Transport of Dangerous Goods by Rail).

IMDG: International Maritime Code for Dangerous Goods

IATA: International Air Transport Association

IATA-DGR: Dangerous Goods Regulations by the : "International Air Association" (IATA)

ICAO: International Civil Aviation Organization

ICAO-TI: Technical Instructions by the "international Civil Aviation Organization" (ICAO)

GHS: Globally Harmonized System of Classification and Labeling of Chemicals.

ACGIH: American Conference of Governmental Industrial Hygienists.

LC50: Lethal concentration, 50 percent

LD50:Lethal dose,50 percent

HMIS III rating

Health:1Flammability:0Physical hazard:0HMIS use a numbering scale ranging from 0 to 4 to indicate the degree of hazard. A value of zero means that the<br/>substance possesses essentially no hazard; a rating of four indicates extreme danger. Although similar, the two rating<br/>systems are intended for different purposes, and use different criteria. The HMIS system was designed to communicate<br/>workplace hazard information to employees who handle hazardous chemicals.
