

MATERIAL SAFETY DATA SHEET

FUJIAN KUNCAI MATERIAL TECHNOLOGY CO., LTD.

Revision date: 2021/01/05

version:1.0

Section 1. Identification of the substance/mixture and of the company

1.1Product Name : Interference Series KC223

Further information obtainable from : Fujian Kuncai Material Technology Co., LTD.

Address : Haicheng road, Yuanhong invest zone, Fuqing (Fuzhou), Fujian, China. 350314

*Hotline:*400-0588-868

Tel: +86-591-85588193

Fax:+86-591-85572333

E-mail:fzkc@fjkuncai.com

Web site:www.fjkuncai.com

Use: Colorants for industrial use

Section 2. Hazards Identification

2.1 Classification of the substance or mixture:

• Hazard description: Not Applicable

• Information concerning particular hazards for human and environment:

The product is not classified as dangerous according to Regulation(EC)No.1272/2008 Classification system:

The classification is according to the latest edition of the Regulation(EC)No.1272/2008, and extended by company d literature data

and literature data.

2.2 Label elements:

Supplemental label information

EUH212: Warning! Hazardous respirable dust may be formed when used. Do not breathe dust.

EUH210: Safety data sheet available on request.

2.3 Other hazards: Not available Potential health effects

1 otentiai neattin ejjecis

Primary routes of exposure:

Routes of entry for solids and liquids include eye and skin contact, ingestion and inhalation. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

Irritation / corrosion:

Inhalation of dust may cause respiratory tract irritation, coughing and breathing difficulties. Contact with the eyes or skin may cause mechanical irritation.

Chronic toxicity:

Potential environmental effects

Aquatic toxicity:

At the present state of knowledge, no negative ecological effects are expected. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations. The product has not been tested. The statement has been derived from the properties of the individual components.

Fitanium Oxide(TiO2) 56-60 13463-67-7 77891 Fit Oxide (SnO2) <1 18282-10-5 77861 Section 4. First aid Measures: General advice: Remove contaminated clothing. If inhaled: Move person to fresh air: Consult doctor in event of any complaints. If if ifficulties occur after dust has been inhaled, remove to fresh air and seek medical attention. If on Shin: Wash with soap and water. If irritation develops, seek medical attention. If on eves: Immediately flush eves with water for at least 1 Sminutes. If disconfort persists, seek medical attention. If on eves: Immediately flush eves with water for at least 1 Sminutes. If disconfort persists, seek medical attention. Wash thoroughly with soap and water. If irritation develops, seek medical attention. If on eves: Immediately flush eves with water for at least 1 Sminutes. If disconfort persists, seek medical attention. Wash affected eyes for at least 15 minutes under running water with eyelids held open. If irritation develops, seek medical attention. If weallowed: If large quantities are ingested, seek medical advice. Not a hazard under normal use conditions. Ruse mouth of the victin is unconscious or having corvulsions. Seek medical attention if necessary. Information for doctor: Fte following symptoms and effects, both acute and delayed: Not available Mazards: Not available Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant	Chemical Name	%(w/w)	CAS No.	CI No.

Section 7.Handling and Storage	Section 7.Handling	and Storage		

Keep in a cool place. Keep container dry.

7.1 Precautions for safe handling: Avoid dust formation. Closed containers should only be opened in well-ventilated areas.

Information about fire-and explosion protection: No special measures required.

- 7.2 Conditions for safe storage, including any incompatibilities:
 - Requirements to be met by storerooms and receptacles: No special requirements

Information about storage in one common storage facility: Not required.

Further information about storage conditions: None.

Incompatibilities: Not available

7.3 Specific end use(s): Not available

Section 8. Exposure Controls Personal Protection

8.1 Exposure controls:

Personal protective equipment:

Wear a NIOSH-certified (or equivalent) organic vapour/particulate respirator. Observe OSHA regulations for respirator use (29 CFR 1910.134).

Eye protection:

Safety glasses with side-shields.

Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/the substance/the preparation.

Due to missing tests no recommendation to the glove material can be give for the product/the preparation/the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to be manufacturer. As the product is a preparation of several substances, the resistance of the

glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

General safety and hygiene measures:

Handle in accordance with good industrial hygiene and safety practice. Due to the colouring properties of the product closed work clothes should be used, to avoid stains during manipulation. Hands and/or face should be washed before breaks and at the end of the shift. Wash soiled clothing immediately.

Primary irritant effect

On the skin: No irritant effect

On the eye: No irritating effect

Sensitization: No sensitizing effects known

Additional toxicological information:

The products is not subject to classification according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version.

When used and handled according to specifications, the product does not have any harmful effects to our experience and the information provided to us.

Toxicokinetics, metabolism and distribution: Not available

Acute effects(acute toxicity, irritation and corrosivity) :

Quantitative data on the toxicity of this product is not available. Product does not contain any deleterious matter.

Repeated does toxicity: Prolonged or repeated exposure to dust may cause pulmonary problems.

CMR effects (carcinogenity, mutagencity and toxicity for reproduction):

The results of animal experiments using pearl luster pigment of this type indicate no toxicological relevant properties. Since the substance is poorly absorbed, no systemic effects are to be anticipated.

Inhalation of dusts should be avoided as even inert dusts may impair respiratory organ functions. No evidence of carcinogenic properties. No evidence of mutagenic or teratogenic effects.

Section 9. Physical and Chemical Properties

Section 9. Physical and	Chemical Froperates
9.1 Information on basic	physical and chemical Properties:
Form	Powder
Odor	odorless
Color A free flowing of	off white powder with a bland violet reflection color.
Particle size:	(5-25) μm
Explosion limits	
Lower	Not available
Upper	Not available
Oxidizing properties	Not available
Viscosity	
Dynamic	Not available
pH-value	7.0-11.0(10% aqueous suspension)
Boiling /Condensation	Not available
Point	
Melting /Freezing Point	Not available
Specific Gravity	Approx. 2.8~3.4 g / cm^3 (water=1)
Ignition temperature	Not available
Self-igniting	Products is not self-igniting
Danger of explosion	Product does not present an explosion hazard
Solubility	Insoluble in water
Electric conduction	Non-conduction
Impurity	<0.5%
Chemical stability	Acid and alkali resistance under the normal temperatures.
Section 10.Stability an	d Reactivity
10.1 Reactivity: No decomp	osition if used according to specifications
10.2 Chemical stability: A	cid and alkali resistance under the normal temperatures
10.3 Possibility of hazard	ous reactions: Not available
10.4 Conditions to avoid:	Not available
10.5 Incompatible materia	als: Not available
Materials t be avoide	ed: Not available
Dangerous reactions	S: No dangerous reactions known
10.6 Hazardous decompo	sition products: Not available
Hazardous reactions: No hazardous reactions w The product is chemicall	when stored and handled according to instructions.

Hazardous polymerization will not occur. Decomposition products: Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated. Thermal decomposition: No data available. Corrosion to metals: No corrosive effect on metal.

Section 11. Toxicological Information

Information on toxicological effects:

Acute toxicity **Oral:** Type of value: LD50 Species: rat **Value:** > 2,000 mg/kg The product has not been tested. The statement has been derived from the properties of the individual components. Irritation / corrosion **Skin:** May cause mechanical irritation. **Eye:** May cause mechanical irritation.

Section 12. Ecological Information

12.1 Toxicity:

No ecological problems are to be expected when this product is handled and used with due care and attention.

12.2 Persistence and degradability: Not available

12.3Bioaccumulative potential: Not available

12.4 Mobility in soil: Not available

12.5 Results of PBT and vPVB assessment: Not available

12.6 Other adverse effects: Not available

Additional ecological information:

General notes:

Water hazard class 1(German Regulation)(Self-assessment):slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system. Fish

Acute: Fish/LC50 (96 h): not determined Chronic: No data available. Aquatic invertebrates Acute: daphnia/LC50 (48 h): not determined Chronic: No data available. Aquatic plants Toxicity to aquatic plants: algae/EC50 (72 h): not determined Microorganisms Toxicity to microorganisms: *bacteria*/*EC50* (0.5 *h*): not determined Degradability / Persistence Biological / Abiological Degradation Evaluation: Not readily biodegradable (by OECD criteria). The colourant is insoluble in water and can thus be separated from water

mechanically in suitable effluent treatment plant

ection 13.Disposal and 3.1 Waste disposal of s Must be disposed of or incir	
Dispose of in a licensed fac	ility. Do not discharge into drains/surface waters/groundwater. It is the waste o determine if a particular waste is hazardous under RCRA.
	can be re-used. Packs that cannot be cleaned should be disposed of in the same
nanner as the contents.	
Section 14. Transport Inj	
4.1 Land transport ADR/R USDOT Not classified as a dangerou	ID (cross-border) us good under transport regulations
Transport category:
